

How great is that?

You love what you do and your clients love what you do. But when it comes to putting the web to work as a valuable business-building tool, the love? Not so much. Truth is, that's not such a bad thing.

Because ExposureManager is *the* easy-to-use resource for photographers who want to sell more and get more out of their business. Quite frankly, we make selling online simple. Very simple indeed.

The professional photographer's online sales force.™

If you shoot it, they will come.

ExposureManager is your customizable full-service online sales resource that makes becoming a more profitable photographer a snap. You can easily configure your ExposureManager website to match your brand and publish and manage galleries how and when you want. You set your pricing, upload your shots and watch the orders come in.

But we're not just an easy-order site—we're your pro lab, too. Not only do we use Fuji printers, our lab is staffed by photo experts who, like you, are nuts about image quality and getting it right the first time.

Want to know how business is going? We make that easy, too. Just use our 24/7 reporting tools to see exactly where each order is in the fulfillment process, and how your business is growing. We focus on sales, you focus on taking great pictures. Talk about a beautiful partnership.

"Why haven't I used them all along?"

Profitable, flexible and very secure.

What a concept.

Not only do we make it easy for you to get your business online with a few simple steps, as a member of the ExposureManager Photographer community you get:

- > To keep more—90% of your sales
- > Unlimited storage space and uploads
- > Access to 24/7 reporting
- > Fully branded—from the site to the packing slip
- > Protection with watermarked proofs

And as the saying goes...much, much more.

We're tech geeks, too.

Our work on the back-end of the system—upgrades and new features—is included with your membership. Essentially we become the research and development team you've always wanted.

Don't even get us started about our lab.

OK, if you insist.

When you work with us we guarantee superior image quality, quick turnaround and:

- > In-house photo experts who review every shot
- > Custom cropping
- > Manual color correction
- > Backprinting

Better yet, we make absolutely certain all photos and products we send meet our unsurpassed quality standards. We're with you every step of the way...from upload to order fulfillment.

We're with you every step of the way.

Did somebody say "broad product offering?"

When you work with ExposureManager you automatically increase the breadth and depth of the products you offer your customers. From your own branded website you'll sell:

- > Regular prints in a range of sizes
- > Larger prints...from 8x10 to 40x60
- > Digital downloads
- > Photo magnets, key tags and cutouts
- > Coffee mugs, T-shirts and aprons
- > Gallery wrap mounted canvas prints
- > USPS approved photo postage

Sound too good to be true? It's not.

And we're ready to prove it. **Sign up today for a 15-day free trial** and get to know why we can easily become your profitable online sales force. Why only 15 days free? Because that's all the time you'll need to get to know and love ExposureManager. **Go to exposuremanager.com today and get selling online.**
