# Spectator

**A cost-effective and mid-range solution for consumers – copy, store, view and present your photos easily anywhere and without a PC!**

View your digital images on the Spectator's vivid 2.5" TFT Colour LCD and zoom in, too! The high-resolution display with a 16 million colour spectrum affords ultra sharp image viewing capability. The newly introduced Spectator has built-in card slots supporting all popular memory cards. This compact digital camera companion offers an integrated Auto-Verify-Function, giving you comforting assurance that the complete copy process from memory card to hard drive was successful. The Spectator has an internal Lithium-Ion battery that makes it an ideal portable digital storage device that you can take anywhere, enjoying and sharing your favourite photos anytime!
