

Top Ten feature enhancements found in version 2.0 of DiIMAGE Messenger

Image Linking - Link Images (not just words) to Image portions (*You can still link text, too!*)

Audio File Linking - Link Audio Files to image portions; record and playback from within GUI.

Browser - Improved GUI that opens to a browser. Select folders from a directory tree; select Images by Thumbnails or name.

Web Page - New "Save as Web Page" feature.

Export --Export as .emf to popular Microsoft Office applications (Word, Excel, PowerPoint).

Reader - Attach Reader to email with .mdm file automatically (optional) instead of Trial Version. (Trial Version can be downloaded.)

New Marquee Boxes - Not just red rectangles, but also ovals, rounded-corner rectangles and free-hand irregular marquees.

Resize Image - Convenient and automatic optional resizing of image files to preserve storage space and reduce email transmission time.

Comment Search - Find annotated files quickly using the new Search functions.

Side by Side - New GUI allows you to view images side by side for comparative annotation.
