Portland, OR - March 13, 2008 - onOne Software, Inc., announces today the availability of Essentials 2.1 software for Adobe Photoshop Elements. This updated version of onOne Software's popular software suite includes a new version of Enlarge it! and support for Photoshop Elements 6 for Macintosh. onOne Software's Essentials 2.1 also features technology from onOne Software's PhotoTune, Mask Pro, PhotoFrame, and Genuine Fractals software products fine-tuned specifically for Adobe Photoshop Elements.

Featuring a new version of Enlarge it!, based on the award-winning Genuine Fractals 5 engine, Essentials 2.1 adds new features for cropping and resizing at the same time. This solves the age old problem of getting an image onto the right size paper for printing. It also adds controls for texture enhancement sharpening and film grain options, as well as improvements in speed.

"Make it Better! Cut it Out! Enlarge it! and Frame it! "And with this new version of Essentials comes an entirely new version of the Enlarge it! tool. It is now even easier and faster for users to crop and resize their images to make excellent poster sized prints with no visual loss of detail or sharpness."
